Android Developer

On site

Centurion

R35 000 – R60 000

Job Summary:

Well established company in Centurion is seeking an Android Developer to join their team.

Qualifications:

Requirements:

bachelor's degree or similar in Computer Science, Engineering, or a related subject.

At least 5 years of proven software development experience with a strong focus on mobile applications for Android.

Extensive experience with Kotlin and Java, along with a solid understanding of the Android SDK. Proficiency in working with remote data via REST and JSON, and knowledge of web technologies and UI/UX standards.

Familiarity with Android UI design principles, patterns, and best practices, along with experience in working with layouts and Material Design.

Experience with Android development tools such as Android Studio, Gradle, Git, and familiarity with continuous integration.

-•—Knowledge of the open-source Android ecosystem and the libraries available for common tasks. Understanding of Google's Android design principles and interface guidelines.

Proven experience in publishing Android apps to the Google Play Store.

Experience with modern architecture patterns (e.g., MVVM, MVP).

Familiarity with reactive programming, dependency injection, and unit testing in the Android context.

Experience with other mobile development frameworks or platforms, such as Flutter or React Native, is a plus.
